

11

If you have reached **point 8** for the **second time** then your next part is finished.

12

To finish the bear fold your work in half and sew around. Leave the top of the head open, turn your work inside out, stuff it carefully and close the seam of the head.

Pull a piece of yarn through the neck and pull it tight to give it a nice shape.

Form the ears, fix them with a few stitches and embroider the face.

Now, your teddy-bear is finished!

CROCHETED TEDDY

The bear is crocheted in one piece. One ball of yarn should be enough.

Begin at the bottom at **point 1** and follow the pattern step by step to **point 12**.

7

In the 8th row just do **18 single crochets + 1 turning chain**. Turn your work.

10

The second part of the bear has to be done in the same way. **Start at point 2**.

9

Do one extra row of single crochets to fold your work over later on.

8

Now do **10 rows of single crochets over the 6 arm-chains**.

6

Then chain **12 + 1 turning chain** for the right leg.

Again, do **7 rows of single crochets**.

5

In the 8th row just do **22 single crochets**.

3

When you have finished the 10 rows for the arm, **chain 12 + 1 turning chain** to the left for the head.

Turn, skip over the turning chain and **crochet back**.

4

For the left leg **chain 16 + 1 turning chain** to the right.

The whole row consists out of 6 chains for the arm + 12 chains for the head + 16 chains for the leg = **34 chains altogether**.

Do now **7 rows of single crochets over these 34 chains**. Don't forget the turning chain!

2

Now do **10 rows of 6 single crochets** for the arm. Don't forget the turning chains, to keep the teddy's straight line.

1 **START**

Start here at the bottom of the right arm. **Chain 6 + 1 turning chain (7 ch)**.
